

## SPEAKERS

October 13, 2012

**MICHAEL MURPHY** is a filmmaker, political activist and President of The Coalition Against Geoengineering. His first movie, "[What In The World Are They Spraying?](#)" has educated millions on the issue of what is being sprayed into our atmosphere through [geoengineering](#), climate remediation and weather modification. People are becoming aware that something is going on in our skies that initially may not make sense and may even challenge their belief systems. Murphy's new movie, "[Why In The World Are They Spraying?](#)" answers the question "why" they are spraying and who stands to gain from this manipulation of the atmosphere. He considers geoengineering to be one of the greatest threats to humanity and the planet. He does this interview with Food Integrity Now from the rain forest of Maui where he and others are working on a "[Clean Sky Ordinance](#)" for the island of Maui.

**DR. ORLY TAITZ, Esq** is nationally recognized as the foremost attorney challenging the legality of Barack Obama to be president. She is currently challenging him in the State of Kansas District Court. The hearing has just been scheduled for October 3rd, at the State District Court, Topeka, Kansas. We hope we will be able to have Dr. Taitz speak to us while so many legal issues are converging before the November election. Pushing to demand proof of birth, proof of social security number, proof of civil service registration all must be pursued. Win or lose, Dr. Taitz is fighting the honorable fight, demanding the truth. But, this isn't enough for Dr. Taitz. She also wants to insure the election code is followed at the polling places. She is coming to us today to talk about election fraud and what we can do for this critical election to guarantee the process. Can we really make a difference? Of course we can. Don't miss this great speaker.

**PATRICK WOOD** is editor of *Findings & Forecasts* and *The August Forecast and Review*. Woods is an expert on international economics, globalization and finance. He is co-author of [Trilaterals Over Washington](#) with the late Antony C. Sutton. In 1981, Mr. Wood founded World Research Library to continue his research. In 2005, Mr. Wood moved to Idaho and resumed the original research and publishing activities to expose the super-elitists (like members of the Trilateral Commission), who continue to have a death-grip on the United States. Technocracy is a word that has been around for some time. How is this term being used? What is their goal? What are they trying to do? How will it affect us? Do we know what is really happening? Come hear Mr. Wood's findings and forecasts for this country and the international financial community.

**NANCY THOMSON**, our very own special UROC Investigative Reporter, comes to us today with an update on Agenda 21, what the ultimate goal really is, where it has already succeeded, and what is going on right now. Nancy is an incredible researcher. She digs for the facts and is here to share with us what she has learned. As we all know, Agenda 21 intends to take over our lives and our businesses. It plans to encompass all aspects of our lives through surveillance, psychology and education in our schools. We are now being faced with Common Core in all our public schools. Want to know what that is? Then be sure to listen carefully to what Nancy has to say.
